

**Welcome to the
International CIRC Meeting
in Bolzano / Italy
dtd. 22nd October 2016**

What is CIRC?

Abbreviation for

Center of Interdisciplinary Research on Compression

CIRC is an independant Research Institute for Compression among other companies supported by medi

CIRC was founded in 2010 in Innsbruck / Austria

The Scientific Director of CIRC is Prof. Hugo Partsch

The philosophy of CIRC is to bring together specialists and opinion leaders in phlebology, lymphology, vascular surgery, dermatologists, orthopaedic surgeons etc. in order to exchange interdisciplinary research on compression.

CIRC would like to

- arrange clinical trials and studies on compression
- establish interdisciplinary working groups, e.g.
 - oedema reduction by compression
 - new therapy concepts for the treatment of venous leg ulcers and lymphoedema
- develop ideas for innovative compression products and new therapy concepts
- discuss which trials and studies are requested to optimize in the future compression therapy
- exchange interdisciplinary research on compression

International CIRC Meetings 2010 – 2016

- 1st International CIRC Meeting: 13th-14th October 2010 in Istanbul / Turkey
- 2nd International CIRC Meeting: 18th-19th November 2010 in Vienna / Austria
- 3rd International CIRC Meeting: 14th October 2011 in Prague / Czech Republic
- 4th International CIRC Meeting: 27th June 2012 in Florence / Italy
- 5th International CIRC Meeting: 10th September 2013 in Boston / USA
- 6th International CIRC Meeting: 12th May 2014 in Maastricht / The Netherlands
- 7th International CIRC Meeting: 11th June 2015 in Melk / Austria
- 8th International CIRC Meeting: 22nd October 2016 in Bolzano / Italy

Research on Compression
Bressanone 10, I - 39012 Italy

CIRC Meeting 2016

Schloss Maretsch, Bozen, Southern Tyrol
October 22, 2016

*New developments of
compression therapy
for leg ulcers and
lymphoedema*

Local Organizer:
Ursula Partsch

PROGRAM

12.30 - 13.30 Welcome Snack

13.30 - 15.30

Compression therapy in leg ulcer healing

Ulcer-legs in Southern Tyrol
Juliane Ebner, Heinrich Ebner, I

Controversial aspects concerning practical compression therapy for leg ulcers: Stockings or bandages?
Eberhard Rabe, D

New tools for leg ulcer treatment
Sue Elvin, UK

Efficacy of Velcro band devices in venous and in mixed, arterial-venous patients
Thomas Moppeney, D

Experiences with Velcro devices around the world
Marta Nothhaft, D & Els Brouwer, NL

Trophic disorders and compression aspects of the treatment of vascular malformations

Sergey Sapelkin, RUS

Discussion

15.30 - 16.00 Coffee break

16.00 - 18.00

Compression therapy in lymphedema

Swollen legs in Southern Tyrol
Claudio Pinzatto, I

Some international experiences with compression for lymphoedema
Franz Josef Schlingensiefel, D

Complex decongestion therapy (CDT): Compression is the deciding component
Niels Davvaagut, B

Compression for lymphoedema: Proof of efficacy
Attilio Cavazzini, I

Velcro band devices or conventional bandaging? Pro and contra
Robert Damstra, NL

Self application of Velcro band devices
Hugo Partsch, A

20.00 After the meeting:

Bus shuttle to **Törggelen Evening**

Braugarten Giardino Forst, Via Val Venosta, 9, 39022 Algund

<http://www.braugartenforst.com>

Shuttle back to hotels: 22.00 and 23.00 hrs

**Thank you very much for
your active participation and
cooperation.**

**Let's all enjoy together the
promising scientific programme.**
